

Dear Residents,

We would like to extend our heartfelt gratitude to each and every one of you who took the time to attend our recent Spring Summit 2024 meeting. Your presence and participation made the event a resounding success, and we are truly thankful for your dedication to our community.

We understand that discussions around certain topics can sometimes lead to disagreements, but your commitment to engaging in constructive dialogue reflects the true spirit of community involvement and collaboration. Our hope is that this will encourage more engagement from our community in a positive way for all that reside here.

On another note:

The board has hired Vice Construction to replace concrete on the south end of the complex. The 100 and 200 buildings will need to carefully navigate this area and it will change as construction starts. Monday is the start date and please be kind to the workers as when this is completed it will be a big improvement to the Berkshire Hills area. When that is completed, another crew will be coming in to clean out all the cracks and install hot asphalt mix to help with keeping the roads better to drive on until we move to the next phase of street replacement. We do not know when that will happen. It all depends on the funds that can be saved.

Thank you

Berkshire Hills Board
